Technical Skills

My skills are the foundation of my success in web development. With expertise in HTML, CSS, JavaScript, and a range of frameworks, I bring designs to life and create seamless user experiences. I excel in problem-solving, ensuring that every project I tackle is efficient, responsive, and visually stunning. My passion for staying up-to-date with industry trends and my commitment to learning ensure that my skills are always evolving to meet the demands of modern web development.

Personal Skills

- **Adaptable Team Member:** Proven ability to seamlessly handle diverse tasks, enhancing collaboration and achieving successful project outcomes.
- **Quick Learner:** Known for thriving in dynamic environments, fostering effective teamwork, and efficiently managing tasks while continuously adapting to new challenges.
- **Multitasking:** Proficient in managing concurrent tasks effectively, optimizing productivity, and meeting deadlines.
- **Problem Solver:** Adept at creative problem-solving, addressing challenges, and finding practical solutions to complex issues.
- **Time Management:** Skilled in time management, ensuring efficient allocation of resources and timely completion of projects.
- **Languages:** Arabic - English.

Experience

- **Freelancer - 2021 - Present**

Completed a variety of web projects, including personal initiatives and online freelance work

- **TurkiyeForAll.com Project - November 2021 - September 2022**

I led the development of "TurkiyeForAll.com," an online platform simplifying the university application process in Turkey. Using Express.js, Node.js, Nuxt.js, MongoDB, and Tailwind CSS, I designed and built a user-friendly platform. It allows users to create accounts, choose universities and majors, and manage document submissions for acceptance letters. I managed the project from start to finish, delivering an efficient solution for academic pursuits.

- **Backend developer in sidekick Real-estate project – 2020**

I developed a RESTful API to facilitate seamless interoperability across various systems, meticulously crafting features and enhancing performance. My responsibilities extended to debugging and promptly resolving application issues, ensuring uninterrupted operation. Concurrently, I diligently maintained and monitored backend services and databases, guaranteeing optimal performance throughout.

Experience

- **COVID19SD.LIVE PROJECT | JUNE 2020 - AUGUST 2020**

Designed and developed the "COVID19SD.Live" project, providing essential information on COVID-19 cases in Sudan during the pandemic's early stages.

Leveraged Laravel, Bootstrap, and AmCharts to create an informative platform that contributed to public understanding of the situation.

- **Web developer at 249 production – 2019**

Crafted and continuously nurtured the company's digital presence through the development and meticulous upkeep of our website

My work

- Tashirtak template

- Crafted the UX/UI for our UAE visa services website, optimizing user flows, form interactions, and information architecture. The design prioritizes efficiency, ensuring a seamless and intuitive application process.

- Real Estate Website Template

USED STACK

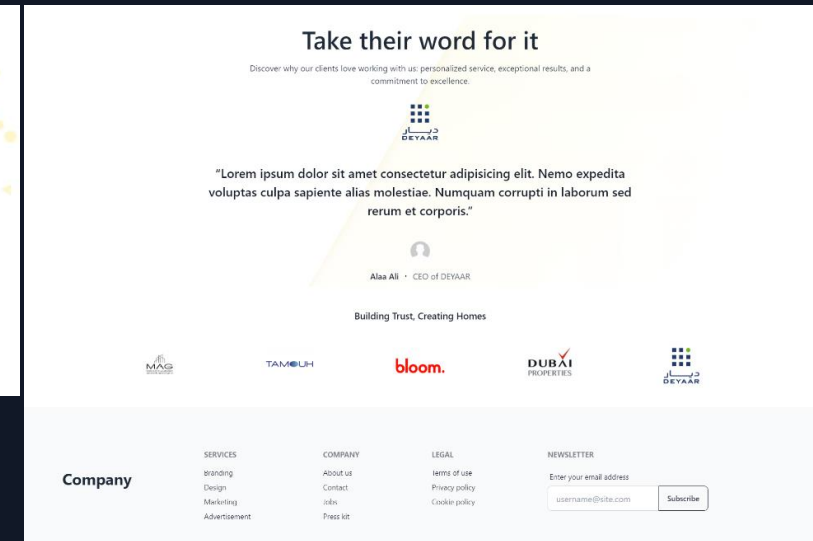

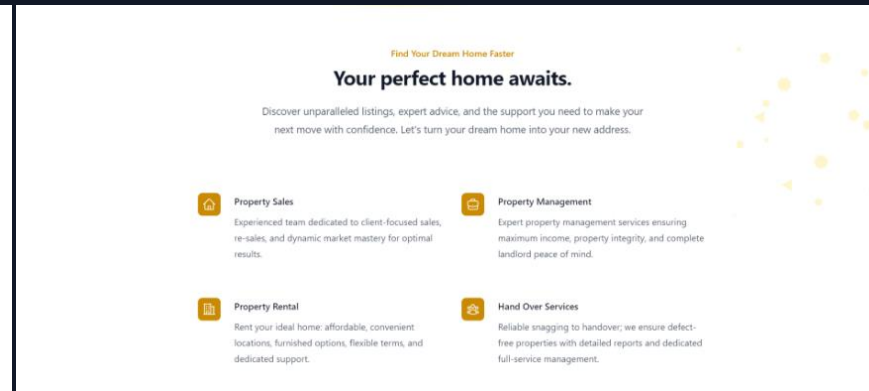

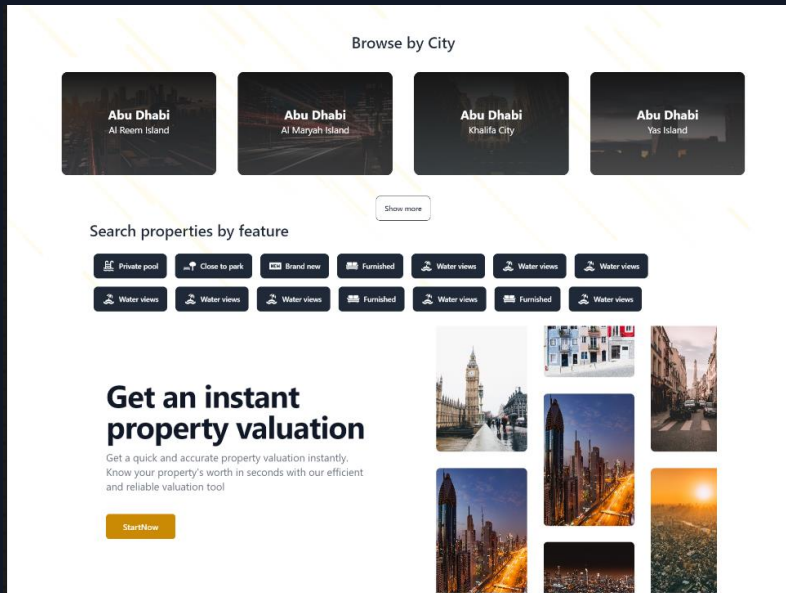

- The goal of this design is to provide a seamless and engaging user experience across all devices, with a mobile-friendly interface that ensures accessibility and ease of use on-the-go. It aims to simplify the property search and acquisition process, embodying a blend of clean aesthetics, intuitive navigation, and straightforward calls-to-action. This design is crafted to foster trust and build lasting relationships with users, encouraging exploration and interaction at every touchpoint, while accommodating the fast-paced, diverse browsing habits of modern home seekers.

My work

- russianlosses.online Russian war stats

USED STACK

This screenshot shows the main landing page of the website. It features a large heading "A MONTH" with a sub-heading "Since the war started". Below this, there is a brief introduction: "Here we review the military, human and economic losses of Russia. The figures were collected from official sources and according to US intelligence reports." The page has a dark theme with a green header and footer. A navigation bar at the bottom lists categories: Military Losses, Economic Losses, Weapons Used, Monthly Charts, Historical Data, and Alerts (soon). The main content area is titled "MILITARY LOSSES" and displays a grid of 12 items, each with an icon and a count. The items are: 586 tanks, 1694 armored personnel carriers, 302 artillery, 2 soldiers, 54 armored vehicles, 17000 soldiers, 7 aircraft, 123 helicopters, 127 drones, 66 UAVs, 73 trucks, and 1150 vehicles.

This screenshot shows the "ECONOMIC LOSSES" section of the website. It features a title "ECONOMIC LOSSES" and a sub-heading "Since the war began, the European Union and the United States of America have imposed packages of harsh sanctions on the Russian economy. Here we review the heavy losses of the Russian economy". The content is organized into four cards, each with a flag and a title: "Europe" (EU flag), "United States of America" (US flag), "Reserves Of Russia" (Russian flag), and "Russian Ruble" (Russian flag). Each card contains a brief description of the economic impact and a "Read more" link. The page has a dark theme with a green header and footer. A navigation bar at the bottom lists categories: Military Losses, Economic Losses, Weapons Used, Monthly Charts, Historical Data, and Alerts (soon).

This screenshot shows the "Monthly Charts" section of the website. It features a title "Monthly Charts" and a sub-heading "Russian Losses data for a month." Below this, there are four bar charts showing data for different categories: "Land Forces Losses" (green bars), "Air" (purple bars), "Sea" (blue bars), and "AA" (brown bars). Each chart shows a steady increase in losses over time. The page has a dark theme with a green header and footer. A navigation bar at the bottom lists categories: Military Losses, Economic Losses, Weapons Used, Monthly Charts, Historical Data, and Alerts (soon).

This screenshot shows the "TOP WEAPONS" section of the website. It features a title "TOP WEAPONS" and a sub-heading "Used By the Ukrainian Military". The content is organized into six cards, each with an image of a weapon and a title: "ATGM Stugna-P", "Bayraktar TB-2 Drone", "NLAW", "FIM-92 Stinger", "Anti Tank Missile - Javelin", and "BTR-4". Each card contains a brief description of the weapon and its use. The page has a dark theme with a green header and footer. A navigation bar at the bottom lists categories: Military Losses, Economic Losses, Weapons Used, Monthly Charts, Historical Data, and Alerts (soon).

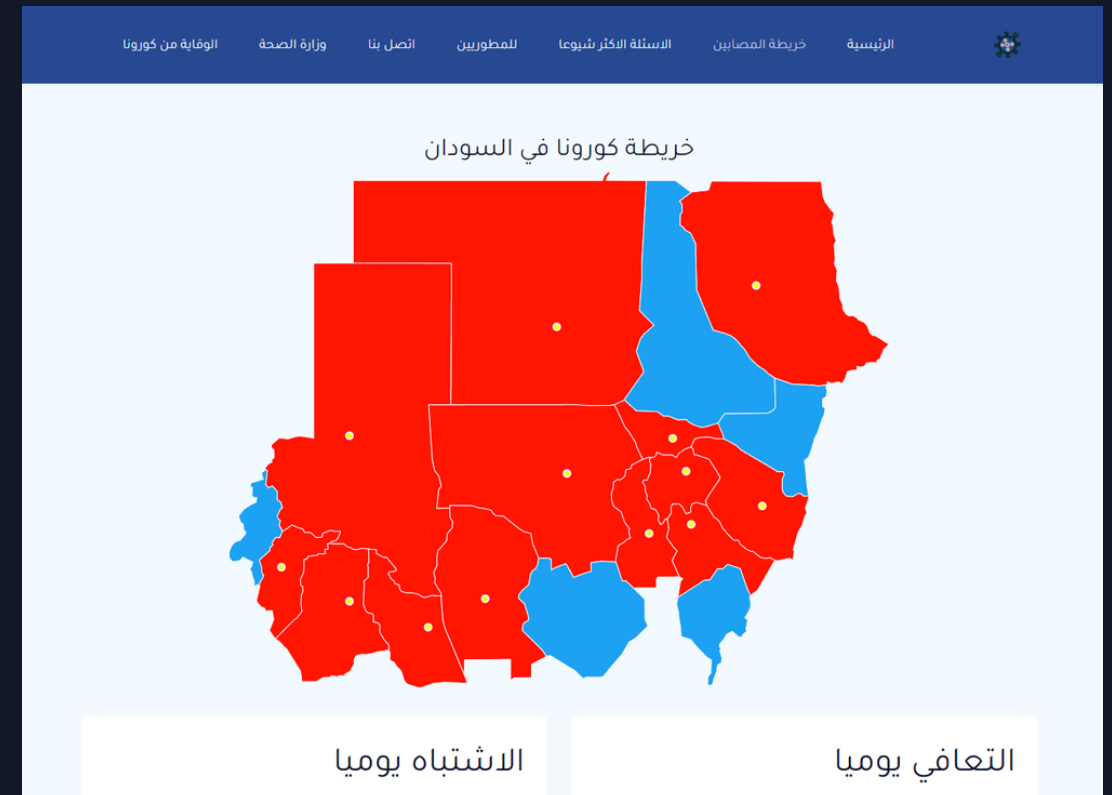

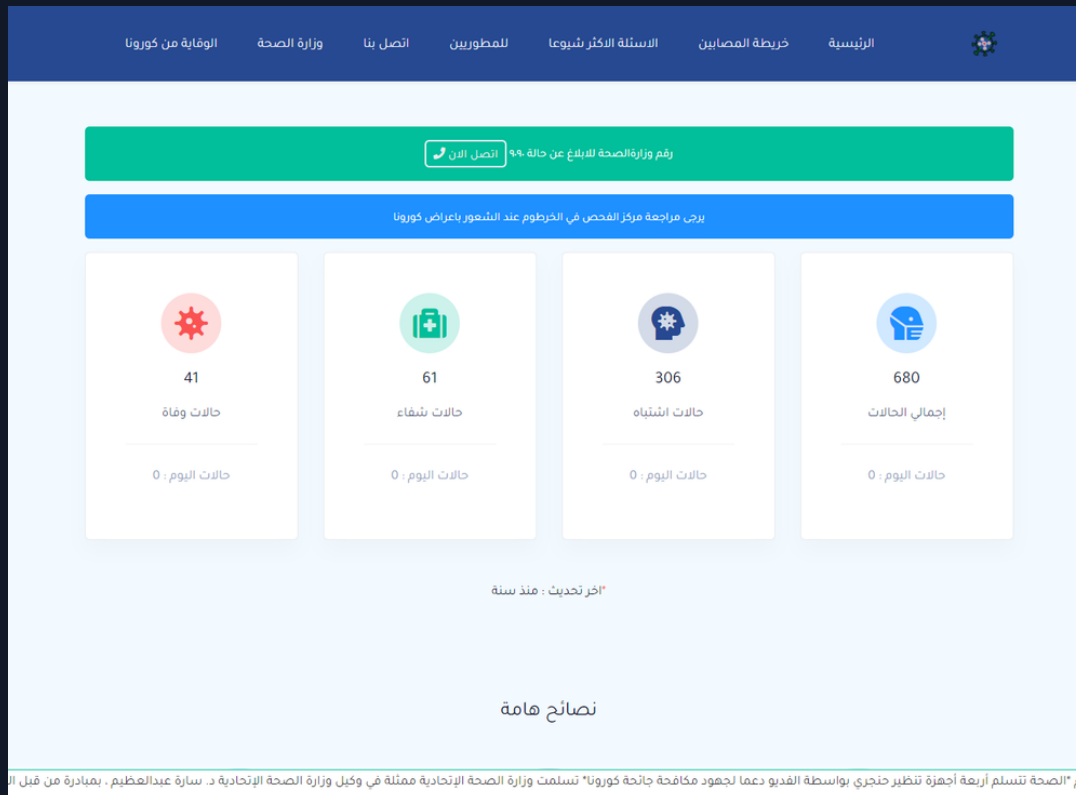

This screenshot shows the "Historical Data" section of the website. It features a title "Historical Data" and a sub-heading "Historical losses of the Russian army since the beginning of the war until now. you can choose a date to show data." Below this, there is a form with two date pickers labeled "From Date" and "to Date", both with the format "mm/dd/yyyy". A "Show Data" button is located to the right of the date pickers. Below the form, there is a large green button with the text "Enter a date to show data". The page has a dark theme with a green header and footer. A navigation bar at the bottom lists categories: Military Losses, Economic Losses, Weapons Used, Monthly Charts, Historical Data, and Alerts (soon).

My work

- covid19sd.live

- Stats for covid 19 in Sudan with a map of affected states.
